

WAVE WMS

Performance • Resilience • Growth

Built for Real-World Warehouse Execution

Warehouse Operations Do Not Tolerate Uncertainty

Inventory is dense. Operations are continuous.

Brings Clarity, Continuity, and Control To Execution

Operate quietly while teams stay focused.

As Complexity Grows, Performance Stays Consistent

That is the standard AC2 WAVE WMS is built to deliver.

Operational Clarity *Maintain control under pressure*

- ✓ Real-time visibility across inventory and execution.
- ✓ Seamless multi-warehouse, multi-owner operations.
- ✓ Processes aligned to how operations actually run.

Execution stays consistent. Even as complexity grows.

Continuity at Scale *Operations evolve. Systems must keep up*

- ✓ Configurable workflows aligned to operational reality.
- ✓ Full traceability across every transaction.
- ✓ Reliable integrations without disruption.

Always current. Always running. No disruption to operations.

“ AC2 WAVE WMS went live on time and within budget, reflecting strong execution and a trusted partnership.

Malik Murad Ali CIO, MYDIN

Design for Modern Warehouses

Built for environments where **scale, variability, and operational pressure** are constant.

From distribution centers to multi-site operations, AC2 WAVE WMS provides a stable foundation for operations that demand **accuracy, responsiveness, and reliability**.

“ With AC2’s WAVE WMS, we can now focus on delivering exceptional customer experiences.

Christina Ng Founder, ChristyNg.com

Execution Aligned to Reality

Nothing assumed. Everything visible

- Continuous visibility across inventory and execution.
- Strategies configured to reflect real operational requirements.
- End-to-end traceability

Receiving and Putaway, Without Friction

Efficiency without constraint

- Guided by configurable rules aligned to real layouts and zoning.
- Supports both system-directed and user-directed execution.
- Flexible across changing volumes and product types.

Enterprise and eCommerce Ready

Connected. Adaptive. Ready

- Integration with enterprise systems and major platforms.
- Centralized execution across all channels.
- Ready connectors for faster rollout.

Execution Without Compromise

Built for performance. Designed for continuity

- Built for consistent operations.
- Scale without operational complexity.
- Engineered for stable performance.

Wave and Continuous Execution

Execution remains aligned. Even at peak

- Supports wave and wireless models.
- Tasks prioritized dynamically based on real-time conditions.
- Consistent throughput across B2B and B2C operations.

Picking and Replenishment, Aligned

Consistent. Controlled. Scalable

- Multiple execution models within a single system.
- Supports both system-driven and user-defined task prioritization.
- Consistent throughput without operational strain.

Continuity through auto upgrades

Operations stay uninterrupted

- Continuous background updates without operational disruption.
- No downtime during system updates.
- Keeps systems current while operations remain fully active.

Outlet Ordering with Full Visibility

Operations stay aligned. No manual effort

- Direct outlet ordering into the system.
- Real-time visibility from order to delivery.

“ With AC2 WAVE WMS, we significantly improved speed, accuracy, and throughput by over 30%.

Lee Tzi Zhao Director of SCM, Ninja Van
